

Dynamics GP Toolbox

Secure, integrate, navigate and simplify day to day operations in Microsoft Dynamics GP

Dynamics GP Toolbox is jam packed with the tools our customers have asked for! The **Dynamics GP Toolbox** foundation was built by combining two popular products, Omni Tools and Mentor, that simplify day to day operations in Microsoft Dynamics GP. Whether you are a system admin or end user, **Dynamics GP Toolbox** has something for everyone.

Dynamics GP Toolbox includes tools to improve navigation, security, and integration to make security, administrative tasks, and the user experience of Microsoft Dynamics GP simple and easy. Need better security? The Password Policy tool allows for advanced password rules, and the User Lockout tool forces logouts of unauthorized users. Trouble with stuck batches? Batch resetting is a one-click process.

Features:

- Manage logins, logout inactive users, and create advanced passwords
- Login Logging monitors GP license usage
- Open or close periods across multiple companies at the same time
- Inspector helps find field and table information (useful for Smartlist Builder, Extender, etc.)
- Mentor finds any window without needing to know its menu location
- Easily find the Role/Task needed to grant or revoke security access
- Redirect zooms to Inquiry when a user can't access Cards
- PopUp adds notes or Tips of the Day to any window in GP
- Version Pro keeps all workstations on the same version of the software you use in your Dynamics GP network

The full functionality of Dynamics GP Toolbox is available for Microsoft Dynamics GP 10 and GP 2010. Limited functionality is available for previous Microsoft Dynamics GP versions. Please contact our sales team for more information at sales@rocktonsoftware.com or call 877-476-2586.
