

Customer Success Story

Saving Time & Saving Lives

A Donate Life Organization

Who is Donor Network of Arizona?

A federally designated, nonprofit organ procurement organization that saves lives through organ, eye and tissue donation for transplantation.

Challenges

One of the challenges that we've had at Donor Network of Arizona is that through the years, our G/L account structure has not always been consistent. As we grew, accounts for some departments were named slightly differently than other departments. The account sequence may have been off as well, due to changing needs throughout the years. Although we've been working to standardize our accounts, we still have a ways to go. For a new employee or for someone not familiar with the accounts, finding the correct account could sometimes be challenging. Another challenge relates to our vendor cards. Again, these were not always set up in a consistent manner, particularly

"SmartFill has been a fantastic addition to GP. The functionality makes finding accounts, vendors, and anything else you need extremely quick and easy."

those that have been around for a long time. In the early days, the vendor ID field was much shorter. Vendors have changed names, etc. Again, while we've been trying to clean up the vendor list, it still can be a challenge to quickly find a vendor using the traditional GP search functionality.

This is Jovani Perez. In 2017, he received a kidney transplant at only 5 years old.

How SmartFill Makes Work Simpler & Easier®

For a new employee or for someone not familiar with the accounts, finding the correct account could sometimes be challenging. SmartFill makes it so easy to find the account we're looking for. We save so much time now and can quickly look up any Vendor with SmartFill.

What does all this mean for Donor Network of Arizona?

Less time spent on unproductive searches and a more productive staff. As the fortunate recipient of Rockton Software's grant for the software, we certainly can't complain about the ROI. However, the functionality would easily pay for itself if we had purchased it by allowing us to be

more efficient and ultimately, save more lives. Thank you, Rockton Software (and your amazing and FUN team), for helping us save more lives!

Want to learn more about organ and tissue donation?

Please visit donatelifeaz.org or donatelife.net and learn more about how you can register to be a donor.

"By using our resources more efficiently, we can direct more resources to our mission and ultimately save and improve more lives."
