Work Simpler & Easier®

## Is **Project Cost** a better choice than **Project Accounting**?

Review the checklist below to see where the gaps lie between these 2 solutions

	Project Accounting	Project Cost
Task Hierarchy		✓
Work Breakdown Structure		✓
Integration with Accounts Payable		✓
Requires Business Portal	✓	
Good Audit and Reconciliation Trail		✓
DCAA or FARS Compliant		✓
Easy Set-up Requirements		✓
Ease of Use		✓
Complex Reporting	✓	
Modify Set-up Options		✓

### Here are some important points to consider:

- Tracking project details and WBS is an essential functionality to modern Project systems.
- Project Accounting may have implementation costs associated with T&E entry.
- Any cost accounting system without a good audit trail and reconciliation tool set is inviting increased maintenance problems as well as concerns with Sarbanes-Oxley compliance.
- Audit problems, lack of Cost Pooling and Allocations are critical issues for Government Contractors.
- Most companies have some unique reporting needs.
- Count the number of windows that need to be opened to bill a single time sheet transaction. Make sure your system is efficient.

Looking into both solutions is important. Make sure you know the ins and outs so you can select the one that will meet your business needs.

**Project Cost** might be just the solution you have been searching for!
