SOFTWARE
Work Simpler & Easier®

Dynamics Report Manager

Fast and easy reporting!
Any report, any time, any place.

What DRM Does

Manage all your reporting without launching other programs

Leverage Crystal Reports with no additional expensive user licensing

Schedule your reports for when, where, and how you need them

Batch reports against a list of data results or by setting your own parameters

Email reports from GP, CRM, Outlook, SMTP

How DRM Makes Your *Work Simpler & Easier*®

» Report Authors can bring all of their report types (Excel, FRx, Crystal, Report Writer, Management Reporter, and SSRS) into Dynamics GP.

» Accounting and Finance Managers can pre-schedule the generation and printing of month end reports, send out batches of invoices for their customers, and easily print common reports from a single location in Dynamics GP.

» GP System Administrators can streamline reporting for users by utilizing parameters that allow files to be attached to emails while also being saved in a selected location for historical purposes or for non-GP users to access. They can also require passwords to access reports that include sensitive information.
